

Taking Care of our Seniors

Dogs age far more quickly than humans and require more attention and care later in their lives. Regular visits to the Veterinarian are crucial to the health of our senior friends. A Senior Wellness Exam every six months is recommended.

How old is your Dog in Human Years?

Age	Small Breed	Medium Breed	Large Breed
1	15	15	15
2	24	24	24
3	28	28	28
4	32	32	32
5	36	36	36
6	40	42	45
7	44	47	50
8	48	51	55
9	52	56	61
10	56	60	66
11	60	65	72
12	64	69	77
13	68	74	82
14	72	78	88
15	76	83	93
16	80	87	100+
17	84	92	
18	88	96	
19	92	100+	
20	100+

Your veterinarian will perform a Senior Wellness Exam and recommend a Senior Wellness blood work Panel.

Having blood work taken from your pet will detect a variety of common diseases such as kidney, liver and endocrine disease. Early detection is crucial in successful treatment of these diseases. It is equally important to receive healthy results, which will give you reassurance that your pet is doing well and provide a baseline for future reference if necessary.
